

Review of Technical Changes for Vendors & Data Providers

Proposed 2017 US GAAP Taxonomy

October 18, 2016

Agenda

- Introduction of speakers
- Typed dimensions
- Extensible enumerations
- Taxonomy disclosure template
- Taxonomy package
- Change Notes/Taxonomy Implementation Notes

Introduction of Speakers

- **Walter Hamscher**
 - Senior IT Program Manager, Office of Structured Disclosure, U.S. Securities and Exchange Commission
- **Campbell Pryde**
 - President and CEO, XBRL US
- **Paul Warren**
 - Technical Director, XBRL International
- **Louis Matherne**
 - Chief of Taxonomy Development, FASB
- **David Shaw**
 - XBRL Project Manager, FASB

Before We Begin...

- Purpose of today's webcast is primarily to discuss the “how” and not the “why”
- Additional information on the why
 - Release notes:
 - <https://tinyurl.com/hbntm5g>
 - Replay of FASB Webcast:
 - <https://tinyurl.com/h46cqo2>
- Additional information is included in the Technical Guide:
 - <https://tinyurl.com/z8exmaj>

Removing Ambiguity in Taxonomy Use

- Reducing and constraining dimension use
 - Use explicit dimensions for disaggregations and move properties to line items
 - Data aggregators prefer line items over dimensions
 - Could use `stringItemType` for properties as line items but extensible enumerations are more precise and constrained
 - Simplify XBRL contexts in instance
 - Use typed dimensions to associate related line item facts and properties
 - *Associated Fact* dimensions
 - Supports properties as line items
- Taxonomy disclosure templates further simplifies and constrains modeling choices

Typed Dimensions

- Explicit dimensions use members defined in the definition linkbase; either base or extension taxonomy
- Typed dimensions are identified by the presence of the `xbrl:typedDomainRef` attribute
 - Defines the simple data type that the members are reported as
 - Date
 - Year
 - String
 - Positive integer
 - ...
 - Member values are specified in the instance document

Typed Dimensions

Typed dimensions are defined by Dimensions specification

- <https://specifications.xbrl.org/spec-group-index-group-dimensions.html>

Typed Dimensions

- Definition linkbase relationships not used
 - Dimension-domain
 - Domain-member (no dimension members)
 - Dimension-default
 - Dimension-domain
- Definition linkbase relationships used
 - All
 - Hypercube-dimension
 - Domain-member (for primary line items only)

Typed Dimensions

- Typed dimensions

Element	arcrole
Definition Link

Retirement Plan [Axis]	
Retirement Plan [Domain]	dimension-default (*)

Typed Dimensions

- Proposed Taxonomy includes positive integer data type
 - Constrains the members in the instance to only positive integers (1, 2, 3, 4, etc.)
- Positive integer members as used here do not have semantic meaning and are only used to associate related information
- Included in the relationship groups for Leases, Revenue, and Retirement Benefits

Typed Dimensions

Example

```
<xs:element abstract="true" id="us-gaap_LeaseClassificationAxis" name="LeaseClassificationAxis" nillable="true" substitutionGroup="xbrldt:dimensionItem" type="xbrli:stringItemType" xbrli:periodType="duration" xbrldt:typedDomainRef="#us-gaap_LeaseClassificationAxis.domain"/>  
<xs:element name="LeaseClassificationAxis.domain" id="us-gaap_LeaseClassificationAxis.domain" nillable="true" type="xs:positiveInteger"/>
```

```
<xbrli:context id="FiscalYear_Duration_01">  
  <xbrli:entity>  
    <xbrli:identifier scheme="http://www.sec.gov/CIK">0000000000</xbrli:identifier>  
    <xbrli:segment>  
      <xbrldi:typedMember dimension="us-gaap:LeaseClassificationAxis">  
        <us-gaap:LeaseClassificationAxis.domain>01  
        </us-gaap:LeaseClassificationAxis.domain>  
      </xbrldi:typedMember>  
    </xbrli:segment>  
  </xbrli:entity>  
<xbrli:period>  
  <xbrli:startDate>2016-01-01</xbrli:startDate>  
  <xbrli:endDate>2016-12-31</xbrli:endDate>  
</xbrli:period>  
</xbrli:context>  
<xbrli:context id="FiscalYear_Duration_02">  
  <xbrli:entity>  
    <xbrli:identifier scheme="http://www.sec.gov/CIK">0000000000</xbrli:identifier>  
    <xbrli:segment>  
      <xbrldi:typedMember dimension="us-gaap:LeaseClassificationAxis">  
        <us-gaap:LeaseClassificationAxis.domain>02  
        </us-gaap:LeaseClassificationAxis.domain>  
      </xbrldi:typedMember>  
    </xbrli:segment>  
  </xbrli:entity>  
<xbrli:period>  
  <xbrli:startDate>2016-01-01</xbrli:startDate>  
  <xbrli:endDate>2016-12-31</xbrli:endDate>  
</xbrli:period>  
</xbrli:context>
```

Typed Dimensions

Open items for Final 2017 Taxonomy

- May add additional data types
 - Retirement benefits – may consider string
 - Revenue – may consider different date data types
 - Year
 - Year-month
 - Duration
- Tool sets will need to accommodate typed dimensions with various data types

Typed Dimensions

Effect of member data type on rendering

- Numeric, date, duration: ordered as schema data type
- Enumerated: enumeration order
- Strings: lexical order

Typed Dimensions

Questions

Extensible Enumerations

List of values that filers can augment

- Like any other line item but with “constrained flexibility”
- Base list is defined in the base taxonomy definition linkbase
- Filer adds values through their extension taxonomy
 - Additions may be base or extension elements
 - “Extensibility” is that the list of values can be added to—not that they are necessarily extension elements
 - So long as they fit the domain
- MUST reference base taxonomy linkrole, i.e., not in an extended linkrole (ELR)

Extensible Enumerations

Contrast with enumerated list:

- Provide possible values defined in us-types-draft-2017-01-31.xsd:

```
<xs:complexType abstract="false" mixed="false" name="zoneStatusItemType">
  <xs:simpleContent>
    <xs:restriction base="xbrli:stringItemType">
      <xs:enumeration value="Green"/>
      <xs:enumeration value="Yellow"/>
      <xs:enumeration value="Orange"/>
      <xs:enumeration value="Red"/>
      <xs:enumeration value="Other"/>
      <xs:enumeration value="NA"/>
      <xs:attributeGroup ref="xbrli:nonNumericItemAttrs"/>
    </xs:restriction>
  </xs:simpleContent>
</xs:complexType>
```

- Any element with this data type can only report the values listed above

(No Value)

(No Value)

Green

Yellow

Orange

Red

Other

NA

Extensible Enumerations

- Filers ability to add possible values is made available by new attributes included:
 - enum:linkrole
 - enum:domain
- To use the Extensible Lists the extension taxonomy **must** reference the domain-member relationships:
 - <http://xbrl.fasb.org/us-gaap/draft/elts/us-gaap-eedm-def-draft-2017-01-31.xml>
- Preparers continue to add labels to the members used

Extensible Enumerations

- Extensible enumerations defined in the specification:
 - Specification
 - <https://specifications.xbrl.org/spec-group-index-extensible-enumerations.html>
 - Schema
 - <http://www.xbrl.org/2014/extensible-enumerations.xsd>
- XII is currently working on Extensible Enumerations 1.1
 - Allows multiple QName values to be reported

Extensible Enumerations

Illustration

us-gaap-draft-2017-01-31.xsd

```
<xs:element id="us-gaap_RetirementPlanExtensibleList" name="RetirementPlanExtensibleList" nillable="true"
substitutionGroup="xbrli:item" type="enum:enumerationItemType" xbrli:periodType="duration"
enum:linkrole="http://fasb.org/us-gaap/role/eedm/ExtensibleEnumerationLists" enum:domain="us-gaap:RetirementPlanDomain"/>
<xs:element abstract="true" id="us-gaap_RetirementPlanSponsorLocationDomain" name="RetirementPlanSponsorLocationDomain"
```

us-gaap-eedm-def-draft-2017-01-31.xml

The screenshot displays a software interface for defining an Extensible Enumeration Domain. On the left, a table lists the properties of the 'Retirement Plan [Extensible List]'. On the right, a tree view shows the 'Extensible Enumeration Domain Members' structure.

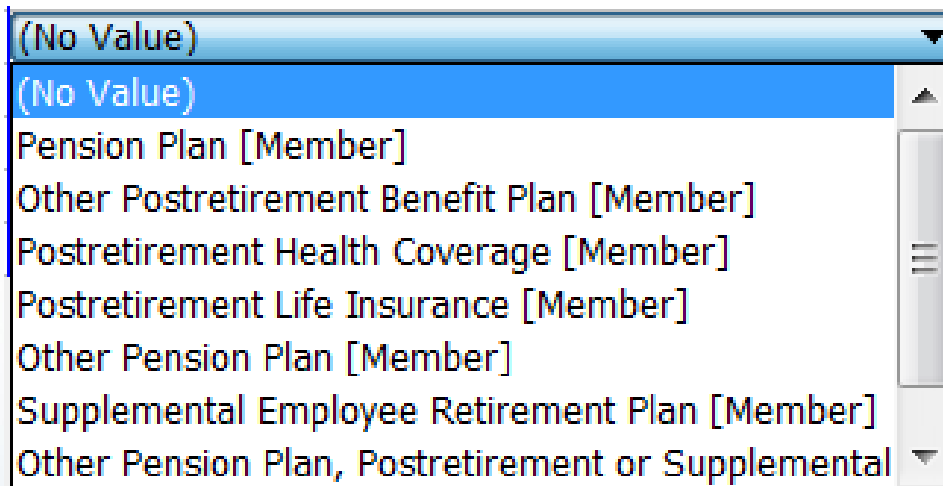

Name	Value
Schema	
name	RetirementPlanExtensibleList
namespace	http://fasb.org/us-gaap/draft-2017-01-31
prefix	us-gaap
abstract	false
id	us-gaap_RetirementPlanExtensibleList
nillable	true
substitution group	xbrli:item
type	enum:enumerationItemType
XBRL	
base item type	QNameItemType
period type	duration
Extensible Enumeration	
link role	Extensible Enumeration Domain Members
domain	Retirement Plan [Domain]
head usable	false

The tree view on the right shows the following structure:

- Extensible Enumeration Domain Members
 - Assets [Abstract]
 - Cumulative Effect of New Accounting Principle in Period of Adoption [Abstract]
 - Income Statement [Abstract]
 - Liabilities [Abstract]
 - Retirement Plan [Domain]
 - Pension Plan [Member]
 - Other Postretirement Benefit Plan [Member]
 - Other Pension Plan [Member]
 - Supplemental Employee Retirement Plan [Member]
 - Other Pension Plan, Postretirement or Supplemental Plans [Member]
 - Postemployment Retirement Benefits [Member]
 - Retirement Plan Funding Status [Domain]
 - Retirement Plan Sponsor Location [Domain]
 - Retirement Plan Tax Status [Domain]

Extensible Enumerations

Illustration

Extensible Enumerations

Example

Benefit Obligation Outstanding:

Our funded plans have tax-exempt status.

Our unfunded plans are located in Europe.

Funded plans	50
Unfunded plans	<u>60</u>
Total	<u><u>110</u></u>

Extensible Enumerations

Example

- Before – properties as dimension-member pairs

Context				Fact Values
RetirementPlanFundingStatusAxis	RetirementPlanTaxStatusAxis	RetirementPlanSponsorLocationAxis	Date	DefinedBenefitPlan BenefitObligation
FundedPlanMember	QualifiedPlanMember	RetirementPlanSponsorLocationDomain	2016-12-31	50
UnfundedPlanMember	RetirementPlanTaxStatusDomain	EuropeMember	2016-12-31	60
RetirementPlanFundingStatusDomain	RetirementPlanTaxStatusDomain	RetirementPlanSponsorLocationDomain	2016-12-31	110

- After – properties as line items

Context		Fact Values		
RetirementPlanFundingStatusAxis	Date	DefinedBenefitPlan BenefitObligation	RetirementPlanTaxStatusExtensibleList	RetirementPlanSponsorLocationExtensibleList
FundedPlanMember	2016-12-31	50	us-gaap:QualifiedPlanMember	
UnfundedPlanMember	2016-12-31	60		us-gaap:EuropeMember
RetirementPlanFundingStatusDomain	2016-12-31	110		

Extensible Enumerations

Open items for Final 2017 Taxonomy

- May include limited additions for Final Taxonomy
- Preference is to use Extensible Enumerations 1.1, which allows for multiple QName values to be reported
 - “The company maintained pension plans in *Poland, France* and *Norway*.”
 - Fact would be:

```
<us-gaap:SponsorLocationExtensibleList>  
  country:PL  
  country:FR  
  country:NO  
</us-gaap:SponsorLocationExtensibleList>
```

Extensible Enumerations

Questions

Taxonomy Disclosure Template

Set of base taxonomy presentation, calculation, and definition linkbase files that can be referenced in extension taxonomies.

- Differs from other linkbases in two important ways:
 - EDGAR will allow the linkbases to appear in the DTS of a submission (i.e., it will appear in edgartaxonomies.xml)
 - Arcs have priority=10, so that EDGAR will not allow filers to remove or override them if referenced
 - *Preparers will continue to add labels*

Taxonomy Disclosure Template

- One example has been included in the base taxonomy that can be referenced in a filer's extension taxonomy, based on an example in the Taxonomy Implementation Guide for Disposal Groups and Discontinued Operations
 - When a filer's disclosures matches one of the examples, the filer need not recreate the modeling in their extension taxonomy
 - Instead reference the template in the Taxonomy (LR 775100)
- Template can still be augmented in the extension taxonomy to more precisely match the filer's disclosure

Taxonomy Disclosure Template

Example from Implementation Guide

<u>Reconciliation of the Carrying Amounts of Major Classes of Assets and Liabilities for Discontinued Operations—Unclassified</u>		As of December 31, 20X0
Carrying amounts of major classes of assets included as part of discontinued operations		
Cash	L1, A1:M1, A2:ExM5	\$ 530
Trade receivables	L2, A1:M1, A2:ExM5	95
Inventories	L3, A1:M1, A2:ExM5	120
Property, plant, and equipment	L4, A1:M1, A2:ExM5	214
Other assets	L5, A1:M1, A2:ExM5	18
Total major classes of assets of the discontinued operation	L6, A1:M1, A2:ExM5	977
Assets included in the disposal group classified as held-for-sale that are not part of discontinued operation	L6, A1:M2, A2:ExM5	187
Total assets of the disposal group classified as held-for-sale in the statement of financial position	L6, A2:ExM5	\$ 1,164
Carrying amounts of major classes of liabilities included as part of discontinued operations		
Trade payables	L7, A1:M1, A2:ExM5	\$ 67
Borrowings	ExL8, A1:M1, A2:ExM5	483
Other liabilities	L9, A1:M1, A2:ExM5	72
Total liabilities of the discontinued operation	L10, A1:M1, A2:ExM5	622
Liabilities included in the disposal group classified as held-for-sale that are not part of discontinued operation	L10, A1:M2, A2:ExM5	84
Total liabilities of the disposal group classified as held-for-sale in the statement of financial position	L10, A2:ExM5	\$ 706

```

OR

- Schema import

```
<xsd:import namespace="http://fasb.org/dis/disopstmp01/draft-2017-01-31" schemaLocation="http://xbrl.fasb.org/us-gaap/draft/dis/us-gaap-dis-disopstmp01-draft-2017-01-31.xsd"/>
```

Taxonomy Disclosure Template

Open items for Final 2017 Taxonomy

- For schema, change taxonomy import to *<http://xbrl.fasb.org/us-gaap/draft/elts/us-gaap-draft-2017-01-31.xsd>* so individual linkbase files do not have to all be referenced to be used
- Considering additions for Retirement Benefits
 - Utilize calculations
- Other implementation guides for 2018

Taxonomy Disclosure Template

Questions

Taxonomy Package

- Manifest file included with the ZIPPED draft Taxonomy that allows compliant tools to identify the entry points automatically
- Manifest file also provides mappings from public URLs (e.g. <http://xbrl.fasb.org/us-gaap/...>) to files in the ZIP
- Conforms to XBRL International Taxonomy Package 1.0 specification
 - <https://specifications.xbrl.org/spec-group-index-taxonomy-packages.html>

Taxonomy Package

Questions

Change Notes

Taxonomy changes were previously identified in the base taxonomy using Change Label, Deprecated Date Label and Deprecated Label.

- Starting with the proposed 2017 Taxonomy Update, all taxonomy changes are identified using the Change Note (CN) consistent with Taxonomy Implementation Notes (TIN) construct introduced with the 2016 Taxonomy Update.
- The information that was previously in the label section can be viewed in the reference section of the Taxonomy alongside the TINs and Accounting Standards Codification references.

Change Notes

Structure

- <http://xbrl.fasb.org/us-gaap/draft/elts/us-parts-cn-draft-2017-01-31.xsd>

Name	Type Local Name	Doc. (en)
TaxonomyVersion	gYear	Taxonomy Version in [CCYY] format
ChangeDate	gYearMonth	Taxonomy change date in [CCYY-MM] format
Source	string	Source for change label. Examples include: ASU - Extraordinary Items; ASU - Revenue Recognition
NewElement	boolean	Identifies new elements
ElementDeprecated	boolean	Identifies deprecated elements
ModifiedDeprecatedLabel	boolean	Identifies Modified Deprecated Label
ModifiedReferences	boolean	Identifies reference changes
ModifiedLabels	boolean	Identifies Modified Standard, Period Start, Period End, or Total Labels
ModifiedDocumentation	boolean	Identifies Modified Documentation Label
PreviousDocumentation	string	Modified Documentation Label. Originally read as follows
DeprecatedDate	date	Deprecation date in [CCYY-MM] format
DeprecatedLabel	string	Deprecation label
ModifiedBalanceType	boolean	Identifies Modified Balance Type Label
ModifiedPeriodType	boolean	Identifies Modified Period Type Label
ModifiedDataType	boolean	Identifies Modified Data Type Label

Change Notes

Rendering

Deferred Policy Acquisition Costs, Period Increase (Decrease) {22}		
Labels		
Type	Lang	Label
Standard Label	en-US	Deferred Policy Acquisition Costs, Period Increase (Decrease) {22}
Documentation	en-US	Amount of increase (decrease) in deferred policy acquisition cost.
Total Label	en-US	Deferred Policy Acquisition Costs, Period Increase (Decrease), Total {22}
References		
Type	Reference	
Change Notes	TaxonomyVersion	2017
	ChangeDate	2016-07
	ModifiedReferences	true
Change Notes	TaxonomyVersion	2016
	ChangeDate	2015-11
	ModifiedDocumentation	true
	PreviousDocumentation	Total net Increase or Decrease in changes to deferred policy acquisition costs due to one or more transactions, including amortization of costs and modifications or internal replacements of existing insurance contracts.
Taxonomy Implementation	PublishDate	2015-11
Net	Positive XBRL Value	Enter a positive XBRL value for increase.

Change Notes

Open items for Final 2017 Taxonomy

- Add additional part to include the ASU number
 - Custom data type will be created
- Make depreciation information consistent across each of the covered Taxonomy years
- Attempt to pare down the parts included in the depreciation information

Taxonomy Implementation Notes

- TINs assist in appropriate element selection
 - “Element is modeled from the income statement perspective. Element may be used in the Statement of Operations.”
- Provide guidance on adoption of new ASU’s
 - “If Accounting Standards Update 2016-01 is adopted, this element may be appropriate for periods of and after adoption.”
- Provide guidance on value polarity
 - “Enter a positive XBRL value for net increases.”
 - “Enter a negative XBRL value for net decreases.”

Taxonomy Implementation Notes

Structure

- <http://xbrl.fasb.org/us-gaap/draft/elts/us-parts-tin-draft-2017-01-31.xsd>

Name	Type Local Name	Doc. (en)
PublishDate	gYearMonth	Publish date for Taxonomy Implementation Note in [YYYY-MM] format
Source	string	Source for Taxonomy Implementation Note. Examples include: Taxonomy Implementation Guide [TIG]; Accounting Standards Update [...]
SourceName	string	Source name, example: Subsequent Events
SourceVersion	string	Source version
Positive_XBRL_Value	string	XBRL value to be entered as positive, when reported amount is present; examples include facts reported as [Gain] [Increase] [Accumul...]
Negative_XBRL_Value	string	XBRL value to be entered as negative, when reported amount is present; examples include facts reported as [Loss] [Decrease] [Accumul...]
Note	string	Taxonomy implementation note.
AlternateElement	QName	Potential alternate element name(s).
AlternateElementForPeriodOfAndAfterAdo...	QName	Potential alternate element names(s) for period of and after adoption.
AlternateElementForPeriodsPriorToAdoption	QName	Potential alternate element names(s) for periods prior to adoption.
TransitionOption	QName 	Transition options for new ASU. Appropriate values include: [Retrospective] or [Prospective]
URI	anyURI	URI link to Taxonomy Implementation Guide.
